## Operations

### Monday- 07/30/2018

**Locations:** Sites 11, 25, 39

**Observations:** Crew began the day in Wenonah Bay working the area around a lake manager buoy, then continuing to work south along the shore, finding three multi-stems 2-6' and five single stems 1-3'. Crew then did a surface spot of South Basin locating only natives before heading back north. Crew worked Little Square Bay, beginning north of a lake manager buoy working south into the "tongue" locating eight multi-stem 2-6' and 20 single stem average height of 2'.

### Tuesday- 07/31/2018

**Locations:** Sites 12, 15

**Observations:** Crew continued working Saginaw Bay, beginning from where the Crew had left of the previous week, working the north shore east, with an emphasis on working throughout probable VLM areas, locating only EWM with two multi-stems 6-7' and two single stems 2-6'. Crew then moved around to the south section of the east shore in the Buck Island Channel working north, finding one single stem EWM 1'.

### Wednesday- 08/01/2018

**Location:** Site 12

**Observations:** Crew picked back up in the south section on the east shore of the Buck Island Channel continuing north and working the area within the channel markers, ending just south of the entrance to the Buck Island Bay, again with an emphasis on probable VLM areas. Crew located EWM, 19 multi-stems 0.5-6' and 21 single stems 0.25-4'. Crew located one VLM 2' south of the Buck Island Bay entrance.

### Thursday- 08/02/2018

**Location:** Site 12

**Observations:** Crew continued to work Buck Island with an emphasis on any possible VLM areas, starting on the south side of the island, working west then north along the west shore. Crew located 11 single stem EWM 1-4' and two VLM single and multi-stem, 2'.

**Total plant tally for the week:** 92 EWM and 3 VLM, 1/5 bag @ 5 lbs.
