

Upper Saranac Foundation

It still is, and always will be, about Water Quality.

Protect this watershed!

This launch is a proud supporter of the Upper Saranac Watershed AIS Prevention Partnership Program.

- Prevent the spread of Aquatic Invasive Species! Invasive plants and animals can negatively impact boating, fishing, swimming, and the environment.
- Aquatic invasive species (AIS) can be spread through the transport of watercraft.
- No person shall launch watercraft unless it can be demonstrated that precautions were made to prevent the spread of invasive species.
- Watercraft coming from other waterbodies must be assessed by an Adirondack Watershed Steward Inspector to determine compliance with the "Clean, Drained, and Dry (or decontaminated)" standard prior to launching. More: www.adkcleanboats.com

**STOP AQUATIC
HITCHHIKERS!™**

Be A Good Steward.
Clean. Drain. Dry.
